

MICHIGAN VOTES COUNTED IN THE HOUR BEFORE ALL POLLS CLOSED AND EXIT POLL RELEASED

SCREENSHOT AT 8:44 PM ET, MARCH 10, 2020 OF MICHIGAN'S DEMOCRATIC PARTY PRIMARY VOTE COUNT IN PROCESS.

CNN reports 423,495 ballots counted in almost all of Michigan save a small sliver in the Central time zone whose polls close at 9:00 PM when the exit polls are to be released. This count represents almost a third of the electorate. The actual precincts in which Edison Research conducted their exit poll surveys may have had a greater or smaller proportion of votes counted. Given that the number of exit poll respondents totaled only 1,685 persons, Edison's incorporation, as usual, of tabulating votes in their exit polls must have significantly altered their original exit poll.
